CS6380 Project2 Individual Report

Name: Prashant Prakash

Net ID: pxp141730

My Contribution

I was involved mainly in clear understanding of Algorithm and Design of Classes so that it sticks to Design patterns and will be hassle free coding. In Coding I implemented the Courier Class which is used as Message Handler for sending and adding messages to all Nodes. I also worked on creating report and readme files.

Maxwell Hall's Contribution

Maxwell did major part in coding and he has clear understanding and very active in tackling with any blocking points in less time. He also worked on Design of classes to have a hassle free coding.

Shashank Adidamu's Contribution

Shashank implemented broadcasting distance update function to neighbors. He also worked on design of classes. He worked on creating different test cases to do a sanity test of program.

Group Contribution

As a team we worked together and for 2 days and helped each other in each other work. We started with a clear vision and for this we started with proper understanding of Algorithm and then did couple of hours' discussion on Design. Because of Design Discussion we reduced the

effort for coding. We also debugged the program together in case of blocking points, which reduced the effort.

Grades

Name	Grades
Maxwell Hall	100
Shashank Adidamu	100
